Software Engineer

I am a Highly self-motivated and goal-oriented professional committed to pursuing a long-term career change in the tech industry, specifically as a software developer. I have a decade-long track record demonstrating strong analytical and problem-solving skills, computer proficiency, written and verbal communication skills, and the ability to meet project deadlines under pressure. My desired career is one that allows me to continue learning, creating, and innovating.

Skills and Accomplishments

♦ Training in programming languages including C#, Javascript, CSS, and HTML.
♦ Computer proficiency as evidenced by helping to troubleshoot errors for a new Electronic Medical Records program at a previous position.
♦ Strong communication skills including a history of concise written documentation and the ability to de-escalate conflict.
♦ Resourcefulness and the ability to problem solve creatively following a decade of experience working in the field of mental health. Experience includes working with severe mental illness and substance abuse, both inpatient and outpatient.
♦ Flexibility and willingness to quickly adapt to change as needed.
♦ Passionate about learning new skills as evidenced by my decision to change careers. Lifelong interests include technology, design, and video games.
♦ Fluent in French as a second language.
